Wind		Coastal/ Southern	All Regions	Southern	Southern	Inland	
Heavy Rain Flash Flooding / Debris Flow							
Snow		Inland (mountains)	Inland (mountains)		Inland (mountains)	Inland (mountains)	Inland (mountains)

Risk Levels

Little to None

Minor

Moderate

Major

Extreme

Weather Key Points

Regional Operations Center

Western Region

Saturday, November 26

- Locally gusty winds of 25-35 mph continue across southern California today, bringing areas of elevated fire weather conditions
- Rain and mountain snow will develop across the state late Sunday through Tuesday, with generally light precipitation possible
 - Accumulating snow could impact mountain travel, primarily in northern California
 - Gusty winds will develop in many locations with this storm, but higher relative humidities will reduce the threat of significant fire weather concerns
- Another storm system may bring another round of gusty winds and additional rain and snow late next week into next weekend
 - This storm system looks capable of producing more rain and snowfall than the first system expected this upcoming week. However, it is still too early for details and potential impacts.

Daily Precipitation Forecast

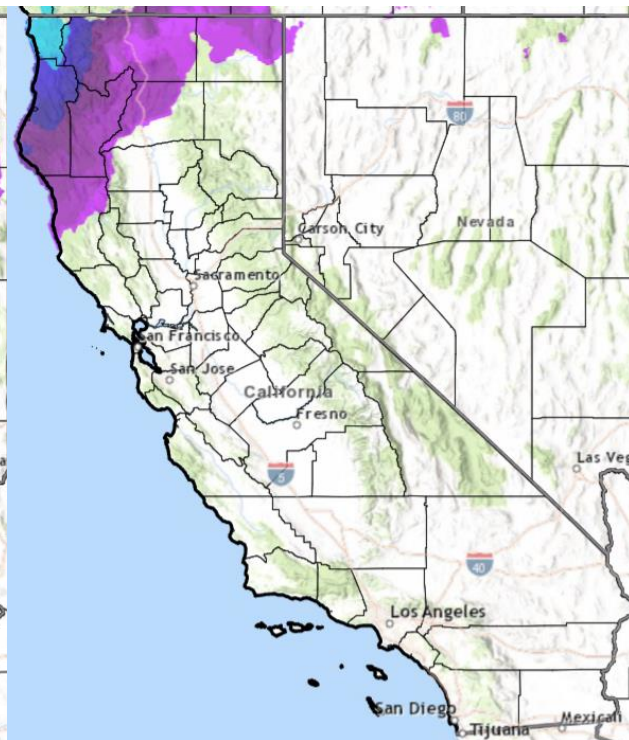

Regional Operations Center

Western Region

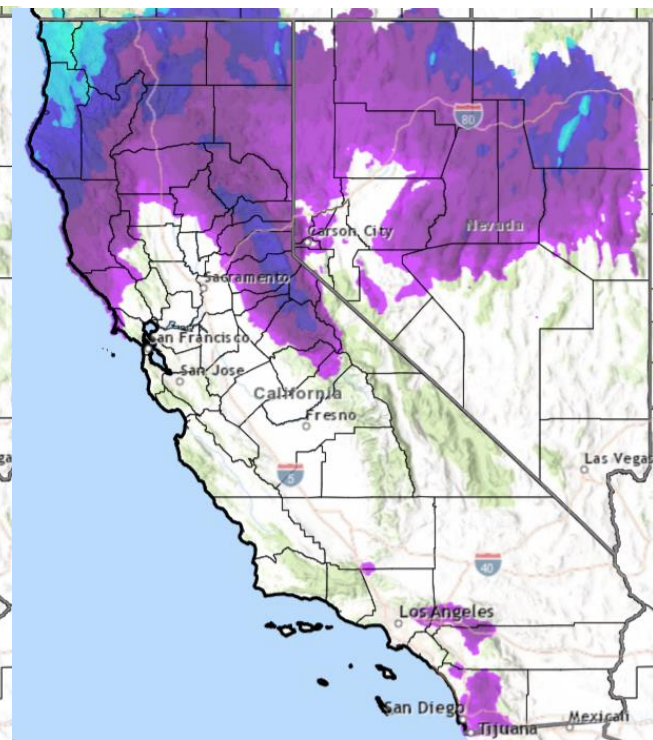

Saturday, November 26

Saturday

Sunday

Monday

Important Note: Forecast precipitation amounts are an average for any particular location. Thunderstorms will produce locally much higher rainfall amounts.

Precipitation (inches)

Weather Outlook (6-14 Days)

Regional Operations Center

Western Region

Saturday, November 26

6-10 Day Outlook (December 1 - December 5)

Temperatures

- Below normal temperatures are strongly favored statewide

Precipitation

- Above normal precipitation is favored statewide

8-14 Day Outlook (December 3 - December 9)

Temperatures

- Below normal temperatures are favored statewide

Precipitation

- Above normal precipitation is favored across central California, otherwise near normal precipitation is favored across the remainder of the state

Wildfire Forecast and Threat Intelligence Integration Center

STATEWIDE WILDFIRE RISK POTENTIAL

Sat Nov 26, 1200hrs

Sun Nov 27, 1200hrs

Mon Nov 28, 0900hrs

Acres

Each map shows the time with the highest wildfire risk potential. 8 hour simulations are run every three hours of the day to produce a map of wildfire risk potential in acres. The average number of acres in an area should not exceed the associated number in the legend. Risk forecast does not consider suppression efforts. Courtesy of Technosylva.

Wildfire Forecast and Threat Intelligence Integration Center

Weekly Fire Potential and Weather Forecast

Northern Region

- Locally breezy northerly & easterly winds will briefly raise fire danger levels across the Sac Vly, north Bay higher ridges and lower west slopes of the Cascade-Sierra Ranges on Sat.
- Fuel conditions will be in a mixed flammability stage with some light herbaceous & shrub green-up across the lower elevations while dead fuel moistures are near to below normal areawide although snow cover exists above 4000-5000 ft.
- Dead fuel moisture values are near to below normal and will fluctuate during the next several days but generally rise next week. ERCs will be near normal to above normal during most of the next 7 days although some lowering will likely occur next week.
- Herbaceous grass and forbs are exhibiting a light flush of green-up, generally below 1500 to 2500 ft. The abundant standing dead from the previous growing season will remain until the combination of precipitation/wind and green-up can "melt" or alter the fuel bed.
- Live Woody Brush-Shrubs & Tree Canopies are likely in a mixed state of flammability with changes continuing due to soil moisture and dormancy trends. Dormancy has set in across the mid & upper elevations due to antecedent widespread freezing. Some new growth, especially in Chamise, will have re-initiated across the lower elevations thanks to additional soil moisture.

Southern Region

- Large fire potential will be very low through the period due to light winds this weekend and cooler temperatures and higher RH over the coming week.
- Despite a lack of wetting rain, some recovery in the lighter dead fuel moistures is likely in the coming days for coastal and coastal valley locations due to the marine layer.
- Dry conditions with light winds are expected this weekend. High temperatures will favor the mid 60s to low 70s in the valleys, 40s and low 50s in the mountains, and low to mid 70s in the deserts.
- Minimum RH values will reach 10% to 20% in most noncoastal locations today. Recoveries will start to improve tonight especially for the coast and coastal valleys.
- A brief period of northerly wind gusts of 20 to 30 mph is possible tonight over southern Santa Barbara county and through the Grapevine.

SITUATION SUMMARY

Cal OES Activation Status

State Operations Center	Inland Region EOC	Coastal Region EOC	Southern Region EOC
Level 1	Normal Operations	Normal Operations	Normal Operations

2022 November Ebola Virus Event

The Medical and Health Coordination Center (MHCC) was activated on 11/09/22 at Level 3 (low) in response to 2022 Ebola Virus Event. The CDC released a Health Alert Network (HAN) health advisory regarding the Outbreak of Ebola Virus Disease (EVD) (Sudan ebolavirus) in Central Uganda. No suspected, probable, or confirmed EVD cases related to this outbreak have yet been reported in the United States.

- The MHCC will continue to be open at 0800 hours to 1700 hours Monday through Friday until further notice.

2022 Pediatric Surge

The California Department of Public Health (CDPH), Emergency Medical Services Authority (EMSA) and Department of Healthcare Services (DHCS) have activated the Medical and Health Coordination Center (MHCC) at Level 3 (low) in response to 2022 Pediatric Surge on 11/16/22 at 1500 hours.

- The MHCC will continue to be open 0800 hours to 1700 hours Monday through Friday until further notice.

2022 May Monkeypox Virus

On 08/01/22, the Governor proclaimed a State of Emergency to support the State's response to Monkeypox. A copy of the proclamation can be found [here](#).

The California Department of Public Health (CDPH) activated the Medical and Health Coordination Center (MHCC) at Level 3 (low) in response to the 2022 May Monkeypox Virus event on 05/24/22; and increased the activation to Level 2 on 07/18/22.

- Hours of Operation: Monday to Friday, 0800 hours to 1700 hours until further notice.

COVID-19 SUMMARY

Coronavirus Disease 2019 (COVID-19)

On 03/02/20 at 0700 hours, the Cal OES State Operations Center (SOC) activated at Level 1 in support of the California Department of Public Health (CDPH) Medical Health Coordination Center's (MHCC) statewide response to COVID-19. Cal OES will continue to provide resource coordination for the COVID-19 event, as well as situation status reporting and advance planning across multiple areas.

SMARTER Plan

On 10/17/22, Governor Newsom unveiled the "[California Smarter Plan Updates October 2022](#)". The plan emphasizes continued readiness, awareness and flexibility and helps ensure California can maintain its focus on communities that continue to be disproportionately impacted and stay prepared to swiftly and effectively respond to emerging COVID-19 variants and changing conditions. Governor Newsom is set to lift the State of Emergency in early 2023, and this update provides information on California's progress to date and how we move forward.

CDPH Statewide Travel Advisory

- For more information: [CDC Travel Guidelines](#)

Confirmed California COVID-19 Cases - Per California Department of Public Health Tracking COVID-19 as of 11/23/22 at 1630 hours:

- 10,611,075 total confirmed cases.
 - 37,317 Delta
- 96,701 total deaths.
 - 207 Delta
- Please see the most recent "Situation Report - COVID-19" attachment for additional details.
